## Off-Campus Access & Technical Support

Many of the Libraries' databases, electronic journals, e-books, and other resources are available online, 24/7! However, most of them can only be accessed from off-campus by **current UW students, faculty, and staff and current Cascadia users**.

You must log in with your eligible UW NetID

- *Sponsored and Shared NetIDs are not eligible even if provisioned*
- See [Borrowing & Access](#) for specifics on eligibility

Connect through **Husky OnNet** OR the **Libraries off-campus proxy service**

### Husky OnNet

[Husky OnNet](#) is a virtual private network (VPN) software application offered by UW IT to provide a secure temporary connection to the UW network from off-campus locations and can be used instead of the Libraries off-campus proxy service for connecting to resources. **You MUST configure it for All Traffic first!**

## UW Examples of Open Pedagogy

**Badass womxn in the Pacific Northwest** by UWB Zine Queenz  
Publication Date: 2019

"This zine is the collective efforts of the students in my spring 2019 class 'Rad Womxn in the Global South' (AKA 'Badass Womxn in the Global South') at the University of Washington Bothell (UWB). Every student in the class found a badass womxn, femme, or enbie (non-binary person) from the Pacific Northwest to research and had to write a very short essay capturing her/his life"--Preface

**Critical Filipinx American Histories and their Artifacts** by Rick Bonus and UW AAS 360 2019 Students  
Publication Date: April 27, 2020

The contents of this online book were created by Prof. Rick Bonus and his students as a final project for a course on "Critical Filipinx American Histories" in the Fall quarter of 2019 at the University of Washington, Seattle campus. In collaboration with the UW Libraries, the UW Burke Museum, and the UW Department of American Ethnic Studies, this book explores and reflects on the relationships between Filipinx American histories and selected artifacts at the Burke Museum. It is a class project that was made possible by the Allen Open Textbook Grant.

Fair use  
Using copyright-protected works

**Creative Commons Licenses**

Scholarly Publishing and Open Access

Copyright Small Claims

Authors' Rights

LIBRARIES HOME / START YOUR RESEARCH / RESEARCH GUIDES / COPYRIGHT INTRODUCTION / CREATIVE COMMONS LICENSES

## Copyright Introduction: Creative Commons Licenses

*Introduction to copyright including exclusive rights, copyright duration, and fair use*

### THE CREATIVE COMMONS

**The Creative Commons is a collective source for digital media that can be used immediately at no cost. If you need media for a project, the Creative Commons can help.**

### HOW THE CREATIVE COMMONS WORKS

In the US, creators automatically receive copyright protection for their works. Copyright includes a combination of rights, is exclusive, and lasts a long time. So in effect, copyright-protected works are unavailable for many uses until long after their creator has passed away. Some uses of protected works are considered fair uses. Beyond fair uses, anyone who wishes to use a protected work often must seek permission from the copyright owner, who may charge a fee.

The **Creative Commons** (CC) allows works to be shared easily. It's an opt-in scheme in which copyright holders assign licenses to their works and share them online. To share your work, just select and attach the license terms you prefer. Or if you'd like to use a work with a CC-license, all you need to do is comply with the copyright holder's terms. It's that easy!

Finally, a special note about **sharing software**: While code is protected by copyright, **CC licenses are not recommended** as a way to share it. Many open source licenses exist for computer code. Please see **CoMotion's guidance** for assigning an open license to software created at UW. For additional information, consult the UW Libraries' **guide to reproducibility**.

# Research Analysis

## Text and Data Mining Guide: Home

*Step-by-step guide on how to get started with your text mining project along with examples of past text mining projects from UW researchers and students.*

### What You'll Find in This Guide?

In this guide you will find the following:

- **Getting started with Text Mining Project** - Step-by-step guide on how to get started with your text mining project along with examples of past text mining projects from UW researchers and students.
- **Text Mining Tools** - Overview of tools for data collection, web scraping, text cleaning and analytics which can be utilized in your text mining project.
- **Data Collection Methods** - Learn about the various ways to acquire data for your Text and Data Mining (TDM) projects.
- **Text Analytics & Visualizations** - A beginner's guide to working with text data to perform analysis and generate insightful visualization.
- **TDM Licenses** - Learn which Libraries subscription tools are licensed to support TDM
- **Text Mining Crash Course** - Learn basic concepts in Text Mining and Analysis with modules.

### What is Text Mining?

Text Mining, also known as Text Data Mining, is a branch of Artificial Intelligence focused on **extracting high-quality information and insights from unstructured textual data**. Text Mining is broadly utilized for information retrieval, data mining and knowledge discovery. It uses computational analysis to process large quantities of information. By taking advantage of **computers' ability to find patterns, researchers can identify patterns in texts and data sets**. Text mining is often focused on natural language texts, while data mining is focused on large data sets. The data found while text mining can be used to understand the relationships between words and documents. A few common text mining tasks are as follows:

1. Text Classification
2. Sentiment Analysis
3. Topic Modeling
4. Document Clustering & Classification
5. Entity & Information Extraction
6. Text Summarization

### Have a Text Mining Question?

The Libraries and eScience Institute offer limited office hour support for text mining. To learn more or schedule a consultation, email [uwtextmine@uw.edu](mailto:uwtextmine@uw.edu)

Text Mining Guide: <https://guides.lib.uw.edu/research/text-mining>

## Geospatial Data Resources Guide: GIS Resources at UW

### GIS Services at the UW Libraries

#### GIS Services the UW Libraries Provide:

Access to GIS software, platforms, and data. See the next column for more information.

Help with **determining your data needs** and assistance with locating data.

Help with incorporating data into your GIS projects.

Help with determining **compatible data formats**.

#### If You Need GIS Help:

Contact the Libraries GIS staff at [uwlib-gis@uw.edu](mailto:uwlib-gis@uw.edu) or stop by the **Government Publications, Microforms & Newspapers, and Maps** reference desk located on the ground floor of Suzzallo.

We can provide in-person help either through an appointment with the UW Libraries' GIS staff or during the Suzzallo Library GIS Lab hours.

#### Data Related Library Units:

[Government Publications](#)

[Map Collection](#)

[Data Services](#)

### ESRI Software, Online Platform, and Tutorials

Use the **Acquiring GIS Software** page to participate in the University's ESRI ArcGIS license and obtain ArcGIS software (for any UW campus).

Sign in to **ArcGIS Online** using your UW NetID to access the University's online platform (for any UW campus).

Use **ESRI e-Learning** to access free, self-paced online courses and training materials for using the ArcGIS software (for any UW campus).

### UW Campus ESRI Site License Info

For information on the site license go to the **ArcGIS Software at UW page**.

The **current list of site licensed software** is also available.

If you are a student, staff, or faculty member, you can download and use ArcGIS Pro on your personally owned hardware. See **ArcGIS Pro** for details.

### Where can I get/use GIS software?

The UW has a site license with ESRI, the producer of ArcGIS and many other products. **The site license requires that software be used only for educational purposes or non-profit research.** This site provides information about **how to get the software, how to install it, and how to connect with the GIS users at the UW.**

### How can I subscribe to the campus GIS mailing list?

**UW-GIS-L** is an open, unmoderated e-mail list for discussion of issues relating to Geographic Information Systems. Any issues related to GIS can be discussed, such as "How do I ...," "Where can I find ...," "What do I need to do ...," "I would like to share ...." Topics may include discussion of hardware, software, data, etc. To subscribe to the campus GIS mailing list follow the instructions on the **UW-GIS-L info page**. For general information about mailing lists at the University of Washington visit the **Mailman List website**.

## Data Visualization: Home

*Data visualization tools, services, and resources.*

### Welcome!

This guide contains data visualization resources, including links to tools available at the UW.

I am available for questions and appointments for **students, postdoctoral researchers, and faculty** at the UW, including **all campuses** (UW Bothell, UW Tacoma, and UW Seattle). Please do not hesitate to contact me or schedule an appointment if you have questions about data and data visualization. For **faculty**, I am also available to come talk to your class about data and visualization.

I am happy to help whether you are trying to figure out what data visualization even is or if you are an expert visualizer.

For **staff**, I can:

- Point you to resources and tools at the UW
- Share information about data visualization communities of practice for further support

If you have questions about designs for a poster or presentation, you may want to reach out to the [Design Help Desk](#) as well.

### Workshops and consultations

UW students, researchers, and faculty are welcome to [schedule a consultation](#) to discuss any data analysis and visualization-related questions. For data visualization-related workshops, please check out the [Open Scholarship Commons calendar](#).

Additionally, the Center for Social Science Computation and Research ([CSSCR](#)) [also offers workshops](#) that may include visualization. Also, the [Center for Statistics and the Social Sciences](#) (CSSS) offers advice on data visualization and presentation on social science data as part of [CSSS statistical consulting](#) as well as a [graduate course \(CSSS 569\) on visualizing data](#) and statistical models of data using R.

# Sharing Your Research

## Article Processing Fee (APC) Support

The following agreements and organizational memberships reduce fees for UW authors to publish Open Access (OA) in several publications. Please note:

- UW Libraries has no central fund to finance APCs for individual articles.
- For detailed information, please consult these publishers' policies.
- Use your @uw.edu email during the submission process so these publishers will know you are eligible for discounts as a UW author.
- If your journal is not listed here, you may be able to deposit your accepted manuscript in UW's repository ResearchWorks at no cost. See [UW's Open Access policy](#) for more information.

PUBLISHER / CONSORTIUM	PUBLICATIONS	REDUCTION TO ARTICLE PROCESSING FEE (APC)	ELIGIBILITY AND MORE
<b>ACM Open (Association for Computing Machinery)</b>	Magazines, conference proceedings, and journals published by ACM	100% reduction. Qualifying authors pay no fees.	The corresponding author must be affiliated with UW. Articles will be deposited into the <a href="#">ACM Digital Library</a> immediately.
<b>Biochemical Society/ Portland Press</b>	All journals	100% reduction. Qualifying authors pay no fees.	The corresponding author must be affiliated with UW.
<b>Cambridge University Press</b>	Gold and hybrid journals: • Hybrid journals give authors the choice whether to publish their articles OA for a fee. Articles that are not OA are available only by subscription.	100% reduction. Qualifying authors pay no fees.	Corresponding authors must be affiliated with UW at the time of submission. • <a href="#">Information for authors</a>

Article Processing Fee Support: <https://lib.uw.edu/scholpub/open-access/support-for-authors/>

# UW Faculty Senate Open Access Policy

Approved by the Faculty Senate, May 17, 2018. Approved by voting members of the Faculty, June 1, 2018. Effective date to be determined. See the [Frequently Asked Questions](#) for more information.

## Purpose

As a public university, the University of Washington is dedicated to making its research and scholarship freely and widely available to the people of Washington and the broader research community. In addition to the public benefit, the following policy is intended to serve faculty interests by: promoting the visibility and accessibility of their work, resulting in greater impact and recognition; helping them retain distribution rights; and aiding preservation of the scholarly record.

## Policy and Grant of Rights

Faculty grant to the University a non-exclusive, irrevocable, worldwide license to exercise, and to allow others to exercise, any and all rights under copyright relating to his or her scholarly articles, in any medium, for the purpose of making their articles freely and widely available in an open access repository. This policy does not transfer copyright ownership to the University.

## Scope and Waiver

This policy applies to all scholarly articles authored or co-authored while a person is a member of the Faculty except for articles completed before the adoption of this policy.

The Provost or Provost's designate will waive this requirement or delay access for a specified period of time for a particular article upon express direction by the Faculty member. Grant of such a waiver or delay is mandatory, not at the discretion of any person or group.

## Deposit of Articles

To assist the University in archiving and disseminating scholarly articles, the Faculty commit to helping the University obtain copies of their articles. Specifically, each Faculty member who does not obtain a waiver to deposit in the Institutional repository will endeavor to provide an electronic copy of the final accepted (post-peer review) manuscripts of his or her articles to the University for inclusion in the institutional repository or notify the University that the article will be available elsewhere on an open access basis.

# Dryad Data Repository: Overview

## What is Dryad?

**Dryad** is a nonprofit data repository offering researchers a secure location for research data storage. UW is now a Dryad member and UW researchers can deposit their data in Dryad at no additional cost to them -- deposit costs are covered by the Libraries' membership fee. This is especially important for researchers with data sets that do not fit in any of the federal or subject repositories.

## Uploading your data to Dryad

Dryad makes it easy for researchers to upload and share their data.

### 1. Login with your ORCID ID

- The first time you use Dryad you need to **login with your ORCID ID**. Don't have one? You can create one straight from the [Dryad login page](#) (see [this guide](#) for more information).
- Because UW is a Dryad member, you will authenticate with ORCID just once to verify your identity.
- After the first login you will be prompted for your UW credentials. Once logged in, you will see the UW logo and can start submitting your data.

### 2. Describe your Data

- You will be asked to enter metadata. Dryad provides [tips for complete and comprehensive metadata](#).
- Refer to Dryad's [submission guidelines](#) for assistance.

### 3. Data Types

Dryad accepts many different types of data:

- If submitting human subjects data, makes sure your data is anonymized and follows both legal and ethical guidelines.
- All data deposited with Dryad must be complete, and open to the public.
- All data must be compatible with the [Creative Commons Zero license](#). Find out more about Creative Commons licenses [here](#).

### 4. Data Curation

Dryad curates (reviews) and then publishes your data. Select the *Private for Peer Review* check box if you want to suspend data publication until after the peer review process is complete. In all cases, the Dryad folks ensure your data is curated. If they have questions, they will be in touch.

## Questions?

More information:

DOMAIN OF ONE'S OWN

RECLAIM  
HOSTING

Digital Scholarship Hosting: <https://ds.lib.uw.edu/>

# Podcasting

## Have you heard?

In a world where everyone interacts with digital media, podcasting is one of the more ubiquitous and longstanding forms of digital scholarship. But podcasting is so much more than a recorded broadcast. It is a compendium of stories and voices often told by individuals within the community.

## Podcasting is personal and personalized.

Podcasting has an endless amount of content and can cater to any need. [Code Switch](#) is a podcast about how race affects every part of society hosted by journalists of color. [Still Processing](#) is a series that examines the culture of entertainment, work, the internet and how they all fit together. [All My Relations](#) explores relationships to land, creatural relatives, and each other with hosts and guests representing various Indigenous tribes.

## And you could be doing it, too.

The University of Washington Libraries invites students to join us in an online learning experience to build the skills necessary to record and edit a podcast episode.

## Welcome to Storytelling Fellows Podcasting!

In this workshop, you can expect to:

- Produce a short 2-5 minute (or longer!) podcast segment by recording, editing, reviewing, transcribing, and reflecting on your work.
- Identify a number of tools, platforms, and strategies for developing and hosting a podcast.
- Learn about the importance of accessibility, preservation, open access, and digital safety.

Overall, the purpose of this workshop is to have a chance to engage in academic or professional work in new and fun ways while learning how to tell compelling stories about meaningful topics.

## Let's listen and learn together.

# Research Impact

We're here to discuss tools and strategies for tracking, documenting, and expanding your research impact.

## What support is available for Research Impact?

We offer consultations or workshops on:

- Citation tracking (e.g. Web of Science, Google Scholar)
- Impact indicators (e.g. h-index, journal impact factor, iCite)
- Bibliometrics & altmetrics
- Creating a scholarly profile (e.g. ORCID, Google Scholar and other databases)
- Open access publishing (e.g. preprint servers, institutional repositories)
- Open science (e.g. Open Science Framework, Protocols.io)

---
